NOTICE OF INTEREST

ENVIRONMENTAL REHABILITATION OF SOIL
Former island port facility located in Quebec Province

ADDENDUM

(Addition information to the notice of interest on this website)

Requested by :

**Environmental Services
Publics Works and Government Services Canada
Quebec Region**

Project Number: R.002340.008
June 2009

The information below provides some details on the site under consideration.

The purpose of the Notice of Interest is the treatment of contaminated soils.

The site is an old access road.

A layer of asphalt is present locally, sometimes on the surface, sometimes under a layer beach deposit, between 0 and 0.5 m below the surface.

The depth of groundwater locally varies between 0.9 and 2 m below the surface.

No information on groundwater quality is available.

The origin of the contamination is not defined, however it can be assumed from the information transmitted.

The corridor of the former access road is immediately beside the sea.

Risk analysis technologies and stabilization technologies will not be accepted.

This memo will be added to the Notice of interest presented on the MCEBR website (www.cemrs.qc.ca).
